DigiComp Update – December 2015

In the November 2015 DigiComp Planning Project Update, we gave details about the use of an online “availability polling” tool for scheduling purposes. Like web accounts, this tool will be a great benefit to both internal and external users, providing a more efficient and timely way of scheduling hearings, meetings, and other group events.

In December the DigiComp Communications Team scheduled and held 13 focus group meetings attended by all non-managerial staff. The team met with Topeka staff in person and with regional office staff by speaker phone. The purpose of the focus groups was to identify any and all questions and concerns the staff may have had about the DigiComp planning project, and the new workers compensation digital system. Many concerns were voiced about system functionality and impact on job duties. Excellent suggestions were gathered. At the outset of each meeting the team advised the group that we might not have immediate answers to their questions; however, the team was actually able to answer some of the participants’ questions. After an initial compilation and analysis by the team members, the results will be shared with the steering committee in mid-January.

The DigiComp Team will continue to provide monthly updates of the status of our project, and details regarding the new system.

DigiComp Communications Team members include Carol Cast, Tara Noll, Roxie Ortiz, Alan Stanton and Jessica Webb.

We welcome any questions or input, which can be sent to digicomp@dol.ks.gov.
